This Key Information Document is dated 16 July 2026 and has been prepared on the basis of data in respect of the period from 14 July 2016 to 14 July 2026.

You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type	Ordinary shares in a Guernsey-incorporated closed-ended investment company limited by shares, listed on Euronext Amsterdam. Shares of the Company are bought and sold via markets. Typically, at any given time on any given day, the price at which an ordinary share can be bought will be higher than the price at which it can be sold, and brokers may additionally charge commissions.
Term	The Company's shares are bought and sold on Euronext Amsterdam. The Company has an indefinite life, but the Board of Directors have the discretion to wind down the Company.
Objectives	Having previously focused on Italian performing and non-performing loans and other real estate related assets in Italy, in July 2022 the Company announced the decision to refocus its investment programme on opportunistic small to mid-size real estate and real estate related assets in Southern Europe (the “New Investment Strategy”). The Company's New Investment Strategy seeks to leverage Fortress Investment Group's (“the Manager”) deep knowledge of the sector, which offers significant investment opportunities in the current market cycle. To pursue this strategy, Eurocastle has launched a Luxembourg regulated fund, European Properties Investment Fund S.C.A., SICAV RAIF (the “Fund” or “EPIF”) through which it invests alongside selected co-investors. In addition to generating attractive risk adjusted returns on its share of any investments made, certain subsidiaries of Eurocastle also anticipate receiving market standard management and incentive fees from third-party investors. The Company intends to grow the platform and views this structure as an attractive means of enhancing returns on the capital it invests while also building a meaningful base for future investments. The Company's portfolio is actively managed by the Manager in accordance with the New Investment Strategy and does not reference or use a benchmark. Save for payments of dividends or other returns (e.g. on a winding up) paid by the Company, investors may expect returns through selling their shares through a bank or stockbroker. The risk and reward profile of the Company described in this Key Information Document assumes that you keep the product for the recommended holding period of 5 years. Investments for the Company are made on a discretionary basis and the Company is not managed by reference to a benchmark. The Company may reinvest distributions arising from investments and may enter into hedging transactions for the purpose of managing financial risks, including currency and market risks. Further information on the Company, the copies of the Prospectus and the latest Company annual report are available at www.eurocastleinv.com.
Intended retail investor	Shares in the Company are suitable only for sophisticated investors who understand and are willing to assume the risks involved in investing in the Company. Prospective investors should not invest unless they are prepared to bear losses (which may equal the whole amount invested) that may result from such an investment.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as a 6 out of 7, which is the second highest risk class. This rates the potential losses from future performance at a high level, and poor market conditions will very likely impact our capacity to pay you. Historically, the shares in the Company have traded at a discount to the Company's net asset value per share, the size of the discount varying depending on a range of factors.

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. The whole amount of your invested capital in the Company is at risk and there can be no guarantee that you will get back any or all of the amount invested on a sale of shares in the Company.

Be aware of currency risk. You may receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks materially relevant to the PRIIP not included in the summary risk indicator are set out on pages 36 to 43 of the Prospectus, including risks related to capital raising, the Company's reliance on the Manager, the Manager's investment discretion and tax and regulatory compliance. This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

The figures shown include all the costs of the product itself but may not include all the costs that you pay to your advisor, distributor or broker. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future. The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average, and best performance of the Company over the last 10 years over monthly rolling windows.

Given the New Investment Strategy, these scenarios might not be indicative of returns that the Company might generate going forward. The main factors likely to affect returns following the New Investment Strategy will be the ability of the Manager to achieve sufficient scale within the platform, successfully identify and invest in appropriate investment opportunities, asset performance, and market conditions. Other factors which could have a material impact on performance of the Company, with respect to the New Investment Strategy, are set out in the tender offer circular published in July 2022.

The stress scenario shows what you might get back in extreme market circumstances.

Recommended holding period			
EUR 10 000		If you exit after 1 year	If you exit after 5 years (Recommended holding period)
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress Scenario	What you might get back after costs	260 EUR	140 EUR
	Average return each year	-97.42%	-57.38%
Unfavourable Scenario	What you might get back after costs	6,710 EUR	9,210 EUR
	Average return each year	-32.87%	-1.63%
Moderate Scenario	What you might get back after costs	11,150 EUR	14,450 EUR
	Average return each year	11.52%	7.64%
Favourable Scenario	What you might get back after costs	23,900 EUR	24,490 EUR
	Average return each year	139.02%	24.16%

The scenarios presented are an estimate of future performance based solely on evidence from the past of how the value of the Company varies and are not an exact indicator. What you will get will depend on how the market performs and how long you keep the investment.

What happens if the Company is unable to pay out?

As a shareholder of Eurocastle Investment Limited you may not be able to benefit from a compensation or guarantee scheme in the event that the Company were unable to pay any dividends or other returns it may elect to pay from time to time, or if it were unable to pay any amounts due to you on a winding up at the end of its life. If you sell your shares on Euronext Amsterdam, your bank or stockbroker will receive cash on delivery of your shares and should pass that to you.

The required statements in this Key Information Document on the Company paying you money are misleading. Investors will likely receive some dividends from the Company, but the majority of an investor's return will come from the sale of their shares when they sell.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

The Company is required to include the information above and below without any changes. The law was drafted for investments which pay returns directly to investors, not those for which a return is expected to be delivered by the investor selling shares on a market. The performance scenarios above are shown based on share price returns together with returns for dividends or other distributions. They are entirely independent of the costs shown below, all of which are borne by the Company and have no direct impact on investment performance of the Company's shares.

If you sell your shares, you would pay your bank's or stockbrokers' dealing charges and be selling at the then available market offer price. That is likely to be lower than the bid price at which others could buy shares at that time. Share prices in the media are typically the mid-price, being halfway between the offer price and the bid price.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- EUR 10 000 is invested

	If you exit after 1 year	If you exit after 5 years (Recommended holding period)
Total Costs	174 EUR	1,700 EUR
Annual cost impact (*)	1.74 % each year	1.88 % each year
(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 9.52 % before costs and 7.64 % after costs.		
Composition of costs		
One-off costs upon entry or exit		If you cash in after 1 year:
Entry costs	We do not charge you an entry fee.	0.00 %
Exit costs	We do not charge you an exit fee.	0.00 %
Ongoing costs taken each year		
Management fees and other administrative or operating costs	The impact of the costs that we take each year for managing your investments.	1.18 %
Transaction costs	The impact of the costs of us buying and selling underlying investments for the product.	0.02 %
Incidental costs taken under specific conditions		
Performance fees and carried interest	The impact of the performance fee and the impact of carried interests	0.54 %

How long should I hold it and can I take money out early?

Recommended Holding Period: 5 years

The Company is designed to be a medium to long term investment and the returns can be volatile during its life.

The recommended holding period is 5 years to take into account the Company's early stage implementation of its New Investment Strategy. As the Company's shares are listed on Euronext Amsterdam, you can expect to sell them at any time through your bank or stockbroker.

How can I complain?

If you choose to invest in the Company and subsequently have a complaint about it, you may lodge your complaint:

- via our website www.eurocastleinv.com
- in writing to investorrelations@eurocastle.com
- by post to Eurocastle Investment Limited, Oak House, Hirzel Street, St Peter Port, Guernsey, GY1 2NP

Other relevant information

The Company reminds prospective investors that past performance is not necessarily indicative of future results, and that this Key Information Document should be considered alongside the material published by the Company on www.eurocastleinv.com. Specifically, projections based on historical data are of limited relevance given the Company is in the early stages of pursuing its New Investment Strategy and there is insufficient historical data on this strategy to provide a useful indication of performance.

The Company currently has no distribution policy and has not made a distribution for over 5 years, being a partial return of capital in March 2021. Depending on how you buy these shares you may incur other costs, including broker commission, platform fees and Stamp Duty. Your adviser or distributor will provide you with additional documents where necessary. We are required to provide you with further documentation, such as the Company's latest prospectus, annual and semi-annual reports. These documents and other information relating to the Company are available online at www.eurocastleinv.com.
